\*mention the courses and the level of relevance in bracket; low, medium and high

### **3.1. Attainment of Program Outcomes (50)**

#### **3.1.1. Describe the assessment tools and processes used to gather the data upon which the evaluation of Program Outcome is based (15)**

(Describe the assessment tools and processes used to gather the data upon which the evaluation of each of the Program Outcomes is based indicating the frequency with which these processes are carried out. Describe the assessment processes that demonstrate the degree to which the Program Outcomes are attained and document the attainment levels)

#### **3.1.2. POs attainment levels (35)**

**Table no. – 3.2 - POs Attainment**

<b>Course</b>	<b>PO1</b>	<b>PO2</b>	<b>....</b>
C101			
C102			
...			
C201			
Attainment levels			

C101, C102 are indicative courses in the first semester. Similarly, C201 is second semester course. First numeric digit indicates semester of study and remaining two digits indicate course nos.

- Direct attainment level of a PO is determined by taking average across all courses addressing that PO. Fractional numbers may be used for example 1.55.

- Indirect attainment level of PO is determined based on the student exit surveys, employer surveys, co-curricular activities, extracurricular activities etc.

**Example:**

1. It is assumed that a particular PO has been mapped to four courses C201, C302, C303 and C401
2. PO attainment level will be based on attainment levels of direct assessment and indirect assessment
3. For affiliated, non-autonomous colleges, it is assumed that while deciding on overall attainment level 80% weightage may be given to direct assessment and 20% weightage to indirect assessment through surveys from students(largely), employers (to some extent). Program may have different weightages with appropriate justification.
4. Assuming following actual attainment levels:

**Direct Assessment**

C201 –High (3)

C302 – Medium (2)

C303 – Low (1)

C401 – High (3)

Attainment level will be summation of levels divided by no. of courses  $3+2+1+3/4= 9/4=2.25$

**Indirect Assessment**

Surveys, Analysis, customized to an average value as per levels 1, 2 & 3.

Assumed level - 2

5. PO Attainment level will be 80% of direct assessment + 20% of indirect assessment i.e.  $1.8 + 0.4 = 2.2$ .

**3.2. Course Outcomes (50)**

**3.2.1. Describe the assessment tools and processes used to gather the data upon which the evaluation of Course Outcome is based (10)**

Describe different assessment tools (semester end examinations, mid-semester tests, laboratory examinations, case studies, mini projects, minor projects, major projects, seminars, presentations, observation record, analysis of plans, reports, projects, outcome of role play and discussion and study report, student portfolios etc.) to measure the student learning and hence attainment of course outcomes. (*Student portfolio is a collection of artifacts that demonstrate skills, personal characteristics and accomplishments created by the student during study period.*)

The process adopted to map the assessment questions, parameters of assessment rubrics etc. to the course outcomes to be explained with examples. The process of data collection from different

assessment tools and the analysis of collected data to arrive at CO attainment levels need to be explained with examples

### **3.2.2. Record the attainment of Course Outcomes of all courses with respect to set attainment levels (40)**

*Program shall have set Course Outcome attainment levels for all courses.*

*(The attainment levels shall be set considering average performance levels in the university examination or any higher value set as target for the assessment years. Attainment level is to be measured in terms of student performance in internal assessments with respect to the Course Outcomes of a course in addition to the performance in the University examination)*

#### **Measuring Course Outcomes attained through University Examinations**

*Target may be stated in terms of percentage of students getting more than the university average marks or more as selected by the Program in the final examination. For cases where the university does not provide useful indicators like average or median marks etc., the program may choose an attainment level on its own with justification.*

**Note:** In case of non affiliating institutions (Autonomous/deemed universities etc.), the attainment level targets may be set considering average performance levels in the preceding years with due justifications.

#### **Example related to attainment levels Vs. targets: (The examples indicated are for reference only. Program may appropriately define levels)**

*Attainment Level 1: **60%** students scoring more than University average percentage marks or set attainment level in the final examination.*

*Attainment Level 2: **70%** students scoring more than University average percentage marks or set attainment level in the final examination.*

*Attainment Level 3: **80%** students scoring more than University average percentage marks or set attainment level in the final examination.*

- Attainment is measured in terms of actual percentage of students getting set percentage of marks.*
- If targets are achieved then all the course outcomes are attained for that year. Program is expected to set higher targets for the following years as a part of continuous improvement.*
- If targets are not achieved the program should put in place an action plan to attain the target in subsequent years.*

#### **Measuring CO attainment through Internal Assessments: (The examples indicated are for reference only. Program may appropriately define levels)**

*Target may be stated in terms of percentage of students getting more than class average marks or set by the program in each of the associated COs in the assessment instruments (midterm tests, assignments, mini projects, reports and presentations etc. as mapped with the COs)*

**Example**

*Mid-term test 1 addresses C202.1 and C202.2. Out of the maximum 20 marks for this test 12 marks are associated with C202.1 and 8 marks are associated with C202.2.*

*Examples related to attainment levels Vs. targets:*

*Attainment Level 1: **60%** students scoring more than 60% marks out of the relevant maximum marks.*

*Attainment Level 2: **70%** students scoring more than 60% marks out of the relevant maximum marks.*

*Attainment Level 3: **80%** students scoring more than 60% marks out of the relevant maximum marks.*

- Attainment is measured in terms of actual percentage of students getting set percentage of marks.*
- If targets are achieved then the C202.1 and C202.2 are attained for that year. Program is expected to set higher targets for the following years as a part of continuous improvement.*
- If targets are not achieved the program should put in place an action plan to attain the target in subsequent years.*

*Similar targets and achievement are to be stated for the other midterm tests/internal assessment instruments*

**Course Outcome Attainment:**

For example:

Attainment through University Examination: Substantial i.e. 3

Attainment through Internal Assessment: Moderate i.e. 2

Assuming 80% weightage to University examination and 20% weightage to Internal assessment, the attainment calculations will be (80% of University level) + (20% of Internal level ) i.e. 80% of 3 + 20% of 2 = 2.4 + 0.4 = 2.8

**Note:** Weightage of 80% to University exams is only an example. Programs may decide weightages appropriately for University exams and internal assessment with due justification.
